COLLECTION AND SHIPMENT OF OTHER SAMPLES FOR IFAR REGISTRY THE ROCKEFELLER UNIVERSITY HOSPITAL

Laboratory of Genome Maintenance

Agata Smogorzewska, MD, PhD Phone: 212-327-7850

PURPOSE:

This sample is being obtained **for research purposes.** Any genetic testing that may be done on this sample has to be confirmed in a clinical laboratory. As the sample is being obtained for research purposes, we cannot say how long it will take to discover findings. Sometimes it can take months or years before we are able to provide any information to the referring physician.

CONSENT:

No sample should be collected or shipped unless a valid consent is obtained. For participants already enrolled in IFAR, consent may already be on file. For questions about consent status, please contact our study coordinator (contact information below).

NOTIFICATION:

Please notify our study coordinator at least one week in advance of buccal swab collection and 2 days before sending genomic DNA samples.

	BUCCAL SWABS	GENOMIC DNA SAMPLES
COLLECTION	Do not eat or drink for one hour before	Please provide 5-10 micrograms of
	collection.	genomic DNA, at a concentration no less
		than 50 mg/mL, in Tris-EDTA (pH 8.0)
	Please collect two samples- one sample	buffer, in a sterile 2.0 mL screw cap tube
	from each cheek.	or equivalent.
		DI A ALL LA CC
	Rub the bristled end of the buccal swab	Please contact the Lab of Genome
	around the inside the cheek for five to	Maintenance if the material does not
	ten seconds.	meet the quantity and concentration
TIMING	C1111 MONDAY	guidelines.
TIMING	Samples should be shipped MONDAY-THURSDAY. Samples should NOT be	
PACKING	shipped on Friday, Saturday, or Sunday.	
PACKING	Place recapped swabs into the paper	It is extremely important to carefully
	envelope provided. Seal the envelope	pack the specimens, providing ample
	and label it with your name. Place paper envelope into padded envelope and use	protection against breakage. Use a rigid
	provided Fed Ex air bill.	secondary container. Use provided Fed Ex air bill.
